

The **Intelligent Transport Systems Association ITS POLSKA** warmly invites you to become a partner in the organization of the **18th POLISH ITS CONGRESS - Intelligent Transport Systems**, which will take place on **May 18 - 19, 2026**, at the **Mercure Warszawa Centrum Hotel**. We invite your company to take part in the organization of the Congress as a **Sponsor or Partner**, with the opportunity to enhance your brand's visibility among participants through various forms of engagement - such as a **presentation, promotional stand, material inserts**, or other tailored options.

The **POLISH ITS CONGRESS** is the **largest event in Poland dedicated to companies and institutions in the ITS sector**. For over 16 years, it has served as a vital platform for sharing knowledge, exchanging perspectives, sparking inspiration, and building business relationships. Since its inception, the Congress has welcomed over **4,000 participants** from **Poland, Europe, Asia, the United States, and Canada**, as well as numerous representatives from government bodies, local authorities, industry institutions, and academia. In 2025, the Congress attracted **over 220 participants** over two days of discussions. Notably, more than **50% were representatives of the public sector**, who attended free of charge, and over **30% came from private companies**. The remaining attendees included staff from NGO's, universities and research institutions.

The Congress has firmly established itself as a cornerstone event in the transport sector calendar, both nationally and across Europe. Each year, it draws **leading experts, speakers, and professionals** who view it as a prime opportunity to showcase innovations, highlight emerging trends, and foster industry dialogue. With each edition, the Congress continues to grow in scope - expanding beyond road transport to include **rail and air traffic topics**, as seen in last year's edition.

This prestigious gathering creates an exceptional opportunity to **exchange experience, demonstrate technologies, and connect with decision-makers** from across the ITS landscape. It also serves as a valuable bridge between **science and industry**, strengthening collaboration between research and practice.

As we prepare the 2026 program, the **Congress Program Council** will continue to focus on **the most relevant and forward-looking topics** in the industry. Presentations are expected to cover themes including:

- Traffic Management Systems
- ITS in Public Transport
- Weigh-in-Motion Systems
- Dual-Use ITS Solutions
- Clean Transport Zones
- ITS Solutions for Automated Clean Transport Zone Monitoring
- ITS Type Approval and Certification in Poland
- Best Practices in ITS Deployment
- Road Safety Enforcement Systems
- Road Transport Automation

- Cybersecurity in ITS Solutions.

The topics outlined above are not limiting - **we welcome presentations on other relevant and forward-looking issues as well.** The final agenda will be shaped based on the subjects of submitted proposals, ensuring the program reflects the full spectrum of industry interests.

We believe that **your company's participation - whether through content contribution or organizational support - will elevate the stature of the POLISH ITS CONGRESS** and reinforce your position among potential business partners, including representatives of local governments and industry competitors.
